The TRAA Works at a Grassroots Level Within the Thames River Watershed to

- 1.protect, enhance and regenerate a viable, multi-species, year-round fishery.
- 2.promote and participate in environmental clean-up, pollution control and rehabilitation.
- 3.breed, relocate and stock to re-establish or augment appropriate species of fish.
- 4.promote environmentally sound sport fishing practices.
- 5.form partnerships with community businesses, government agencies, special interest groups, landowners, and other stakeholders in the Thames River watershed.
- 6.increase public awareness of the unique diversity of the Thames River Watershed, its challenges, its recreational opportunities and its vital importance to our community.

In the spring of 1986 the TRAA was formed by anglers concerned with the state of the fishery in the Thames River watershed, particularly the dwindling smallmouth bass population in the North Thames River.

The TRAA has a history of always having a core group of active members supported by those who just want to be part of the solution. Either way, In their advocacy for the health of the Thames River watershed and its inhabitants.
